Xyfection
87 Grant Avenue
Auburn, New York 13021

We had Xyfection provide disinfection services for our law offices for the entire flu season in 2018 and 2019. The process was performed after hours and resulted in my not contracting the flu and not missing a single day of work. My household was also spared.

I definitely credit the disinfection of our offices for reducing the chances of contracting the flu. Our staff also benefitted in remaining healthier, which resulted in a reduction of employee absence allowing us to be fully staffed to help our clients.

We see many elderly people in our offices and using Xyfection helps to reduce exposing our clients to influenza. It's a small expense that I believe has tremendous benefit to the overall level of healthiness of our offices.

Very truly yours,

Stephen T. McMahon
