Lorraine L Manzella
Administrative Director

Dear Mr. Blount,

Xyfection has been providing electrostatic disinfection services to our newest facility, Upstate University Medicine, since early 2020.

Upstate University Medical Associates @ Syracuse (UUMAS) recognizes the need to put the health and safety of our staff and patients first. Exploring options for periodic building disinfection, as well as acute disinfection when exposed to viruses and bacteria (e.g. influenza, coronavirus, etc.), led us to selecting Xyfection. This was based on product effectiveness and safety, and the speed, thoroughness and efficiency of product application.

We are highly satisfied with your company and glad we made the decision to contract with Xyfection for disinfection. Your staff are professional and courteous, and the finished product allow our staff, patients and visitors the safest environment when receiving health services.

Without hesitation, I recommend you and your company to any facility with the need for disinfection services.

Sincerely,

Rick Platis, Operating Officer
